1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The paragraph inserted immediately after the title on page 1 has been amended in the following way.

-- This application is a continuation of co-pending U.S. Patent Application Serial No. 09/553,277, filed April 20, 2000, now U. S. Patent 6,632,398, the entire disclosure of which is incorporated by reference herein. --

2. The following is an examiner's statement of reasons for allowance: the art of record fails to teach or fairly suggest the claimed rotor structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additionally cited art is directed toward rotors having notches or slots in the periphery. Of note are Maddox (US 3,744,974) and Andrevski (US 5,882,903) having structure that might be considered to have a V-shape. Andrevski does not have the required V-shape. The teeth like projections (24) of Maddox are not on a periphery of the rotor but are present to mate with corresponding indentations in cuvette ring (6) and prevent relative rotation between the disk and rotor assembly. The optical analysis occurs in the cuvette ring which forms the periphery of the rotor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arlen Soderquist whose telephone number is (571) 272-1265. The examiner can normally be reached on Monday-Thursday and Alternate Fridays.
